

Web Based Application

Delta Core is an online workers compensation reporting and tracking system. Our web-based system provides a convenient interface for any federal, state, local government or private organization user to submit, report, and track claims regarding workplace injuries and safety incidents. Now users can file workers compensation claims in an accurate and timely manner, doing away with the burdensome and confusing paper process.

OUR TECHNOLOGY BEATS INDUSTRY STANDARDS

1. Adheres to federal recommendations for the handling of claims
2. Easy to use web-based system with Internet/Intranet and VPN capability
3. Personalized dash board and convenient search engine tool
4. Secured access for employees, supervisors, coordinators, and record-keepers
5. Direct electronic communication Office of Workers Compensation Program
6. Increased coordination between Workers Compensation Coordinators and Office of Safety and Health Administration Record-Keepers

Business Application

A MESSAGE FROM THE PRESIDENT...

EXECUTIVE MEMORANDUM (01/2004) - SAFETY, HEALTH, AND RETURN-TO-EMPLOYEMENT (S.H.A.R.E.) INITIATIVE

1. Lower workplace injury and illness case rates
2. Lower lost-time injury and illness case rates
3. Timely reporting of injuries and illnesses
4. Fewer lost days resulting from work injuries and illnesses

MEET YOUR S.H.A.R.E. GOALS NOW!

Delta Core is an automated business tool which resides on your infrastructure for controlled access and security. Our administration tool uses role-based security allowing limited access to all necessary users which provides stability and flexibility over business process workflow and document control. Our reporting tools provide detailed analysis over your compensation budget and spending trends to address physical or environmental elements affecting injuries and incidents. Now, users have a confidential and comprehensive environment for all of their workers compensation needs!
